Election/R strictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20, 32, and 33, drawn to urethane foam composition, classified in class 521, subclass 170.
- II. Claims 21-31 and 34, drawn to laminate, classified in class 428, subclass 304.4.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP § 806.04(h)). In the instant case, the intermediate product is deemed to be useful as a padding material and the inventions are deemed patentably distinct since there is nothing on this record to show them to be obvious variants. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1711

During a telephone conversation with Leah Reimer on 1/29/2003 a provisional election was made with traverse to prosecute the invention of I., claims 1-20, 32, and 33. Affirmation of this election must be made by applicant in replying to this Office action. Claims 21-31 and 34 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicants should note that the restriction has been modified to appropriately place claims 21-25 with group II., as these were inadvertently placed with group I. by the examiner making the phone call on 1/29/03.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-20 and 32-33 are rejected under 35 U.S.C. 102(b) as being anticipated by GB-2,327,681.

Art Unit: 1711

GB-2,327,681 discloses preparations of polyurethane foams prepared from isocyanates having functionalities as low as those claimed, polyols having hydroxyl functionalities as low as those claimed, catalyst, and surfactant, wherein various combinations of polyethers and polyesters including those based on caprolactone are utilized(see the entire document). Applicants' claimed compression, recovery, and thermoformability degree values are held to be inherent to the various teachings of GB-2,327,681 owing to the similarities of the teachings involved.
